

Metal Roofing & Siding: Know What You Are Buying!

Certain distributors would like consumers to believe that all metal roofing is created equally. It is a myth that is kept alive by suppliers that offer products of a lesser quality with warranties that are either non-existent or crafted in such a way as to be of little value.

Here is a list of hard facts that consumers can be confident of when purchasing metal roofing components from Mackey Metal Roofing:

1. **Sales Support:** MMR is both a distributor AND installer of metal roofing. With 10+ years of hands-on experience in the metal roofing industry, we are able to provide our clients with the advice and support that they need to make the right decisions at all stages of their metal roofing or siding project.
2. **Steel Thickness:** MMR is a proud distributor of ABC metal roofing & siding components. ABC leads the industry in steel thickness with 29 gauge panel & trim measuring 0.015" minimum **PRIOR** to painting. When it comes to the metal on **YOUR** roof, thicker **IS** better.
3. **Corrosion Resistance:** MMR offers Galvalume steel as standard on all of its products. Galvalume, a protective coating made-up of 55% aluminum, 43% zinc and 2% silicone, provides **2X to 4X** the corrosion resistance of G-90 Galvanized steel. The difference is even greater when compared to G-60 Galvanized steel. MMR's Galvalume steel products are backed by a written, **NON-PRORATED** 25-year corrosion warranty backed by North America's largest metal roofing manufacturer.
4. **Paint Quality:** All of MMR's premium painted products are backed by a written, **NON-PRORATED** 40-year paint warranty backed by North America's largest metal roofing manufacturer.
5. **Fast Delivery:** MMR offers weekly deliveries throughout the USA and Canada via a network of ABC-employed drivers and ABC-owned trucks. This means that your materials arrive **ON-TIME** and **UNDAMAGED**.
6. **Consistency:** Modern machinery coupled with over a century of hands-on experience means that each piece of metal roofing that you order is square and made to specified dimensions.
7. **Competitive Pricing:** When comparing apples-to-apples, MMR products are priced competitively out of the starting gate and offer the lowest life cycle costs given their performance, longevity and the peace of mind that comes with non-prorated warranties.

The purchase of a new roof is a significant investment. The purchase of inferior metal roofing components from suppliers offering questionable warranties, even if at a discounted price, almost always results in additional costs to the home / building owner. We encourage you to know what you are buying before making a final decision.
